Lighting

No compromises,
only performance

Wanderer Neo

LED STREETLIGHT

150W

Built for Everyday Urban Reliability

Dynamic public spaces need lighting that enhances safety, improves visibility, and performs consistently, year after year across all weather conditions. Wanderer Neo is designed to deliver uniform illumination, visual comfort, and dependable operation, combining energy-efficient performance with robust durability.

It helps create safer, more welcoming public spaces while reducing maintenance requirements and supporting long-term infrastructure needs.

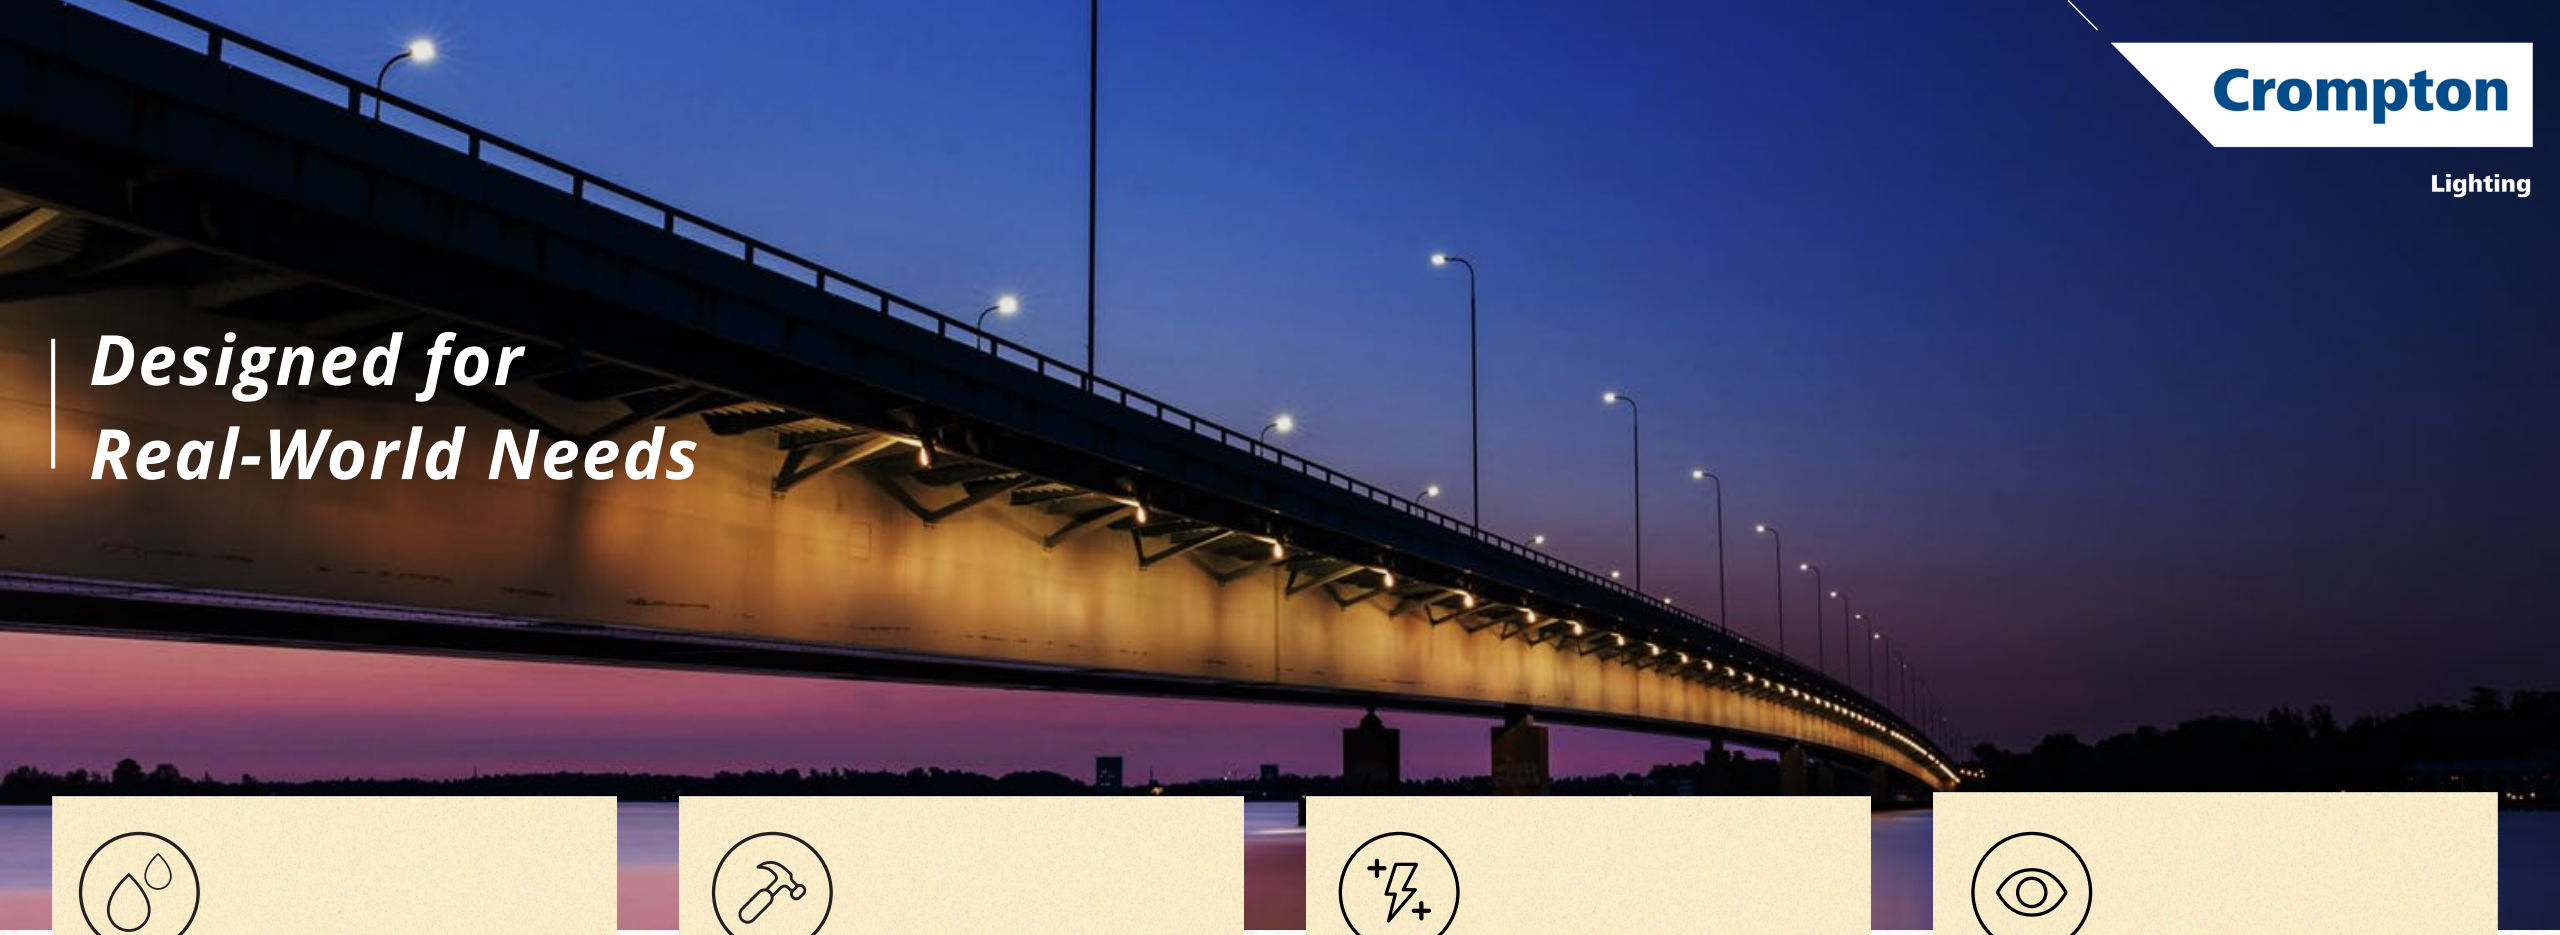
Lighting

Crompton

Lighting



Designed for Real-World Needs

Enhanced Safety & Visibility

An integrated IP lens along with secondary optics for wide beam distribution to enable uniform illumination & improved visibility

Reliable Outdoor Performance

IP66 and IK08-rated construction to ensure dependable operation in challenging weather conditions

Lower Energy Consumption

High-efficacy LED technology delivering up to ≥120 Lm/W, reducing energy consumption and lowering operating costs

Consistent Visual Comfort

A CRI of ≥80 and multiple CCT options provide clear visibility and a comfortable lighting experience across applications

Technical Specifications

Wattage
150W

Ingress Protection
IP66

CCT
3000K / 5700K

Housing Colour
Grey

Impact Resistance
IK08

Lens
Integrated IP lens

Surge Protection
4kV

CRI
≥80

LED Type
SMD

Efficacy
≥120LPW

Certification
BIS for luminaires

Product Description	Nominal Wattage (W)	CCT (K)
ERP-435-150-857-HL2-LM-NTG	150W	5700K
ERP-435-150-830-HL2-LM-NTG	150W	3000K

Application Areas

Crompton
Lighting

Gardens

Municipal Roads

Security Lighting

Gated Communities
